As a vendor operating in Michigan, you are responsible for collecting and paying Michigan sales, use and withholding taxes. You must remit sales tax on all sales of tangible personal property from an event at a Michigan location to an end user ("retail sales") at the rate of 6 percent. You must also remit use tax on all goods taken from inventory or purchased exempt from Michigan sales tax and used in your business unless you paid sales tax of at least 6 percent to another state. For example, prizes given for games of skill or chance.

You must also remit income tax withholding for wages paid to anyone working for you while you are in Michigan, regardless of that person's state of residence. For example, either hiring local people when you are in Michigan or bringing your own employees with you.

Complete each line below as instructed. If you have questions, please contact the Sales, Use and Withholding Tax Customer Contact Division at (517) 636-4730.

Sales Tax Collection

Retailers are required to remit a 6% sales tax on their taxable retail sales to the State of Michigan. Effective January 1, 2006, a retailer must calculate the amount of sales tax to collect by using the following rounding formula.

To determine the amount of tax to remit, compute the tax to the third decimal place and round up to a whole cent when the third decimal place is greater than four, or down to a whole cent when the third decimal point is four or less.

How to Compute Withholding

To calculate tax amounts to withhold, employers may use a direct percentage computation (example shown below) or use the Michigan Income Tax Withholding Table. This table is found in Form 446, *Michigan Income Tax Withholding Guide*. Additional information regarding sales, use and withholding taxes, as well as Form 446 and the income tax withholding tables, is available by visiting the Michigan Treasury Web site www.michigan.gov/businessstaxes.

<u>Payroll Period</u>	<u>2010 Allowance per Exemption</u>
Weekly	69.23

Withholding Formula

[Compensation - (allowance per exemption x number of exemptions)] x Calendar Year's Withholding Tax Rate.
Example: An employee with 3 exemptions earns \$600/week in 2010 - the 2010 withholding tax rate is 4.35%.

The Direct Percentage Calculation is:

[\$600 - (\$69.23 x 3)] x 4.35% = Amount to withhold

[\$600 - \$207.69] x .0435 = \$17.07

How to Compute Penalty and Interest

If a return is not filed or tax is not paid within three days of your event, you must include penalty and interest with your payment. Penalty is 5% of the tax due. Penalty increases by an additional 5% per month or fraction thereof, after the second month, to a maximum of 25%. Interest is charged daily using the average prime rate, plus 1 percent.

You may refer to our Web site for current interest rate information, or help in calculating late payment fees.
